

...follow us into the age of neutrinos

Neutrino® Energy stands for more than technological short-term solutions, it is about technologies of the future, for a “fair and better world”.

(October 2017)

Why “EARLY BIRDS shares” of NEUTRINO ENERGY Germany are a great opportunity

Example TESLA / News article from FOCUS online from April 05, 2017: TESLA now most valuable car producer! Gaining more than 40% since the beginning of the year, e-car producer Tesla is now the superstar of Wall Street. Starting at about \$ 10.00 per share prior to flotation, it reached \$ 312.8677 (€ 295.20) per share on April 11, 2017.

For me, NEUTRINO® ENERGY is the top LEAGUE of energy production and plays a unique role there due to the qualities of its individual features. Neutrino® Energy (power supply) has an even greater potential in my opinion: Recharging batteries of e-cars without the need for a charging station, power supply for apartments, houses, companies, offices, city halls, kindergartens, etc... Rudolf Georg Wunderlich.

A special and individual offer for a small select circle of experienced partners who have the opportunity to obtain “Early Bird Shares” prior to flotation: Within the framework of private placement, the purchaser individually obtains still unlisted preference shares of the parent company Neutrino, Inc, Reg. No. D 187706, 609 North Rodney Street, Helena, Montana 99601, USA, minimum purchase 10000 shares. Current price \$ 15.00/share.

Note on risk: Purchasing shares and investing always entail substantial risks and may result in a complete loss the capital invested.
